General Reports of the XIXth Congress of the International Academy of Comparative Law

Rapports Généraux du XIXème Congrès de

l'Académie Internationale de Droit Comparé Martin

Schauer 2017-06-01 This book deals with

convergences of legal doctrine despite jurisdictional, cultural, and political barriers, and of divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars.

Written by leading scholars from more than twenty countries, its thirty-two chapters present a

comparative analysis of cutting-edge legal topics of the 21st century. While each of the countries

covered stands alone as a sovereign state, in a

technologically advanced world their disparate

systems nonetheless show comparable strategies in dealing with complex legal issues. The book is a

critical addition to the library of any scholar hoping

to keep abreast of the major trends in contemporary

law. It covers a vast area of topics that are dealt

with from a comparative point of view and

represents the current state of law in each area. ?

The Oxford Handbook of Law, Regulation and
Technology Roger Brownsword 2017-07-20 The
variety, pace, and power of technological
innovations that have emerged in the 21st Century
have been breathtaking. These technological
developments, which include advances in
networked information and communications,
biotechnology, neurotechnology, nanotechnology,
robotics, and environmental engineering
technology, have raised a number of vital and
complex questions. Although these technologies
have the potential to generate positive
transformation and help address 'grand societal
challenges', the novelty associated with
technological innovation has also been
accompanied by anxieties about their risks and
destabilizing effects. Is there a potential harm to
human health or the environment? What are the

ethical implications? Do these innovations erode or antagonize values such as human dignity, privacy, democracy, or other norms underpinning existing bodies of law and regulation? These technological developments have therefore spawned a nascent but growing body of 'law and technology' scholarship, broadly concerned with exploring the legal, social and ethical dimensions of technological innovation. This handbook collates the many and varied strands of this scholarship, focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors, through which leading scholars in the field interrogate the interfaces between law, emerging technology, and regulation. Structured in five parts, the handbook (I) establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance; (II) explores the relationship between technology development by focusing on core concepts and values which technological developments implicate; (III) studies the challenges for law in responding to the emergence of new technologies, examining how legal norms, doctrine and institutions have been shaped, challenged and destabilized by technology, and even how technologies have been shaped by legal regimes;

(IV) provides a critical exploration of the implications of technological innovation, examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development, and the implications of employing new technologies as an instrument of regulatory governance; (V) explores various interfaces between law, regulatory governance, and new technologies across a range of key social domains.
