Dierenbrein & mensenlijf Barbara Natterson-Horowitz 2013-01-15 Toen Barbara Natterson-Horowitz naar de dierentuin van Los Angeles werd geroepen bij een aap met een hartkwaal, kwam ze tot een baanbrekend inzicht. Het zou haar werk als cardioloog en psychiater ingrijpend veranderen. Ze ontdekte dat er fascinerend veel overeenkomsten zijn tussen mensen en dieren. Dieren kunnen dezelfde ziektes krijgen als mensen. Als we weten hoe deze ziektes bij dieren kunnen worden bestreden, ligt genezing bij mensen binnen handbereik.

AP Biology Deborah T. Goldberg 2020-03-03 "Get ready for the AP Biology exam with all the review and practice you need. Detailed review and practice covering all relevant topics for the AP Biology exam. Two full-length practice tests that reflect the actual exam in length, question types, and degree of difficulty. Resources for Teaching Middle School Science Smithsonian Institution 1998-03-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

Mama's laatste omhelzing Frans de Waal 2019-05-20 In 'Mama's laatste omhelzing' richt Frans de Waal zich op het rijke emotionele leven van dieren. Het boek opent met het dramatische afscheid in Burgers' Zoo tussen Mama, een stervende 59-jarige chimpansee, en Jan van Hooff, de bekende hoogleraar biologie. Hun laatste ontmoeting werd gefilmd en vervolgens door miljoenen mensen bekeken. Na zijn succesvolle boek 'Zijn we slim genoeg om te weten hoe slim dieren zijn?', brengt de Waal met 'Mama's laatste omhelzing' onder de aandacht dat mensen ook emotioneel meer verwant zijn aan dieren dan we denken. Frans de Waal interpreteert gezichtsuitdrukkingen en vertelt over de emotionele kanten van dierlijke én menselijke omgangsvormen. Hij ziet geen fundamenteel verschil tussen dierlijke en menselijke emoties en bespreekt de gevolgen van deze visie voor de manier waarop we met dieren omgaan. Dankzij de vele voorbeelden en de heldere taal van De Waal is 'Mama's laatste omhelzing' niet alleen een feest om te lezen, maar verandert het ook voorgoed onze kijk op het gevoelsleven van dieren.

5 Steps to a 5 McGraw-Hill 2006 Provides a study plan to build knowledge and confidence, discusses study skills and strategies, and provides practice tests in the most popular AP subjects.
