Basic Nursing Patricia Ann Potter 2003 Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management,

maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

Chemical Technology F. A. Henglein 2013-09-11 Chemical Technology is based on lectures the author gave at the Technische Hochschule of Karlsruhe and at the University of Freiburg. Part 1 of this book deals with chemical technology and describes subjects dealing with apparatus, unit operations, and chemical economics. The text reviews industrial chemical reactions, raw materials preparation for reaction, thermal and catalytic processes, and a history of chemical technology. This part also addresses transportation, storage of raw materials, and the design and construction of a chemical factory. Part 2 concerns special chemical technology, including topics such as raw material upgrading; processing of products in the chemical industry; and unit processes application toward consumer goods production. This part reviews materials sourcing from animals, minerals, and vegetables, such as processing of products from living organisms, the recovery of sugar, starch, and other carbohydrates. The book also reviews products of the chemical industry including low-molecular weight consumer goods, detergents, aromas, explosives, plastics, elastomers, synthetic leather, textile, and some building materials. Chemistry students, chemical and process technology students, and mechanical engineering students with interest in chemistry will find this book valuable.

Health Assessment for Nursing Practice - E-Book Susan Fickertt Wilson 2016-09-09 Today's nursing students are busier and more pressed for time than ever. The good news is that Health Assessment for Nursing Practice, 6th Edition caters to your needs by focusing only on the information you need to master the core assessment skills and thrive in clinical practice. In addition to its focused content, you can look forward to straightforward and easy-to-understand language; vivid photos; clean page layouts; and of course the latest information on topical things like electronic documentation, QSEN competencies, and cultural considerations. Plus, with its abundance of engaging learning tools — like case studies, procedure videos, animations, and insightful call-outs — you'll be able to maximize your learning AND study time! Straightforward, easy-to-understand coverage gives readers the knowledge and confidence to perform a complete physical examination. Clear differentiation between basic skills and advanced procedures or special-circumstance procedures helps readers pinpoint essential assessments. Two-column format creates a visual distinction between normal and abnormal findings and techniques. Vivid full-color photos walk readers step-by-step through key assessment techniques to better understand key abnormalities. UNIQUE! Concept Overview boxes present core concepts in the context of health assessment, with discussions of pain, oxygenation, perfusion, tissue integrity, motion, sensory perception, metabolism, and intracranial regulation. UNIQUE! Clinical Reasoning boxes explain the thought process of an experienced nurse making a clinical decision to help readers gain expert perspective on clinical judgment and the decision-making process in nursing practice. UNIQUE! Patients with Situational Variations sections address special circumstances or needs for patients in wheelchairs or other limitations and exam variations. Documenting Expected Findings sections demonstrate how to chart normal findings -- a perpetual area of struggle among nursing students. Review questions in the book help assess reader's understanding of need-to-know content. UNIQUE! Case studies at the end of each chapter give readers practice in developing clinical reasoning skills in the context of health assessment and physical examination. UNIQUE! Adapting Health Assessment to the Hospitalized Patient chapter explains special techniques for performing a head-to-toe assessment of a patient in a hospital setting. Health Promotion for Evidence-Based Practice boxes apply the U.S. government's Healthy People 2020 objectives and include thorough discussions of recommendations for health promotion and reducing risk. Ethnic, Cultural, and Spiritual Variations boxes help readers anticipate the unique needs of a multicultural patient population. Health Assessment Across the Life Span unit contains four separate chapters that cover all lifespan content, including older adults, pregnant patients, and infants, children, and adolescents. Synthesis and Application of Health Assessment unit details how to conduct, document, and adapt the head-to-toe examination.

Advances in Human Aspects of Transportation Neville A. Stanton 2016-07-26 This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is given to smart technologies and automation in transport, as well as to user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2016 International Conference on Human Factors in Transportation, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, mainly addresses transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists dealing with traffic safety, management, and sustainability issues in transport.
