Databases and Information Systems V Hele-Mai Haav 2009 The Eighth International Baltic Conference on Databases and Information Systems took place on June 25 2008 in Tallinn, Estonia. This conference is continuing a series of successful bi-annual Baltic conferences on databases and information systems (IS). The aim is to provide a wide international forum for academics and practitioners in the field of databases and modern information systems for exchanging their achievements in this area. The original research results presented in Databases and Information Systems V mostly belong to novel fields of IS and database research such as database technology and the semantic web, ontology-based IS, IS and AI technologies and IS integration. The contribution of Dr. Jari Palomaum;ki showed how different ontological commitments affect the way we are modeling the world when creating an information system. As semantic technologies have been gaining more attention recently, a special session on semantic interoperability of IS was organized. The invited talks from each Baltic State gave a good insight how semantic interoperability initiatives are developing in each of the Baltic States and how they relate to the European semantic interoperability framework.

Het element Ken Robinson 2011-12-20 Het Element is het punt waar natuurlijk talent en persoonlijke passie elkaar ontmoeten. Als mensen in hun element zijn, zijn ze het meest zichzelf, het meest geïnspireerd en halen ze het beste uit zichzelf. Dit boek is een lofzang op de adembenemende diversiteit van menselijke talenten en passies en ons buitengewoon potentieel voor groei en ontwikkeling. Op zijn eigen bevlogen manier zet Robinson de lezer aan tot denken en inspireert hij iedereen om het Element te vinden.
